

[MultiCAX Interoperability]

CATIA V5 CAA to/from JT Direct Translator

Accurate Translation

- ✓ Developed using CATIA V5 CAA Toolkit
- ✓ Elysium's JT translation technology ranked number 1 in industry benchmark
- ✓ Bi-directional translation between CATIA V5 and JT: Exact geometry representation and visualization, and PMIs (3D annotations, dimensions and symbols)

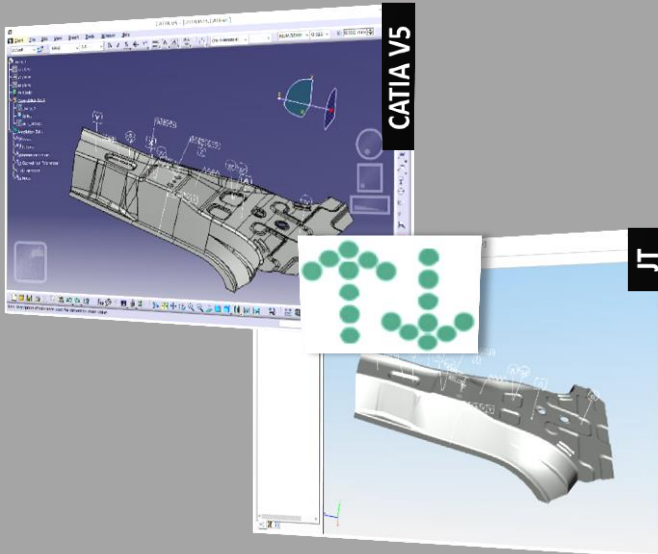

Scalability

- ✓ Support user-specific JT requirements by "JT Configuration File"
- ✓ Can be integrated into enterprise-level systems such as PDM, PLM etc.

Simple Operation

- ✓ Direct import / export of JT data from CATIA V5 user interface

Elysium is the Official Data Translation Provider to Daimler Supply Chain

Elysium develops interoperability solutions for digital design and PLM markets, with millions of files translated and thousands of customers worldwide. Founded in 1984, Elysium is headquartered in Hamamatsu, Japan, and has additional offices in Southfield, MI and Huntington Beach, CA in the U.S. and Paris, France. Elysium currently supports data exchange among CADCEUS, CATIA V4/V5/V6, DELMIA, ACIS/SAT, SIMULIA Abaqus, SolidWorks, 3D XML, Inventor, OneSpace Modeler, Pro/ENGINEER/Creo, Wildfire, NX I-DEAS, NX, JT, Parasolid, XVL and the IGES, STEP and STL standards. Elysium products, including ASFALIS, CADdoctor and CADfeature, are the favored solutions of many leading companies for translating, repairing, and ensuring the product data quality of 3D CAD/CAM and CAE models. Elysium is a member of the JT Open community.
